Online collaboration with WebEx 3

Why WebEx? SaaS, security,
reliability, performance 4

Web conferencing is a powerful, easy way to exchange ideas and information over the web—anytime, anywhere. It combines real-time desktop sharing with phone conferencing so everyone sees the same thing while you talk. Share information, make decisions, review documents, present ideas—just like you would in person. Get your distributed teams on the same page, talk with people from remote offices, and deliver product demos to customers or conduct press briefings. Anything that you can do face-to-face you can do online with web conferencing. Save onsite travel for the most important business transactions, and schedule an online meeting to help you get work done faster and more efficiently. Successful companies around the world trust Cisco WebEx™ web conferencing solutions, more than any other, to enable them to more effectively:

- Make sales presentations to prospects.
- Conduct interactive training sessions for employees, customers, and partners.
- Bring distributed project teams together to review documents, discuss product plans, and exchange ideas.
- Gather feedback from customers and partners from around the world.
- Conduct regular meetings between geographically scattered staff members.
- Hold creative sessions with marketing and advertising teams.
- Collaborate with designers and engineers to review product requirements, adjust schedules, and get progress reports.

Use WebEx® Web Conferencing from Cisco® throughout your business to share information, engage prospects, collaborate with colleagues, train customers, and even provide remote support. Trust industry-leading WebEx solutions to help you save money, increase efficiency, broaden your reach, improve communication, and boost customer satisfaction.

Online collaboration with WebEx

Meet one-on-one or present to thousands of participants. Schedule meetings in advance or start an instant online meeting and invite people to join you by email, text message, or an IM. It's easy to integrate WebEx into every aspect of your business. You can share any type of content and let your meeting participants take control over your desktop for a truly interactive, hands-on meeting experience.

- Show documents, applications, and your desktop to remote attendees in real time.
- Pass control to attendees so they can share their desktops or annotate yours.
- Collaborate on content as you annotate.
- Switch between different sharing modes without transitions or distractions. No need to upload files to a server.
- Engage your audience by incorporating Microsoft® PowerPoint®, Adobe Flash® animations, and audio and video in your presentations.

- Choose toll or toll-free with call-in or call-back. Or give attendees the option to join using integrated VoIP on their computers.
- Use polls and surveys to gather instant feedback.

Want to see who is talking while meeting online? Share up to six webcams in a meeting and show video of all speakers to simulate the face-to-face interaction. It's a great way to improve productivity, get more done faster, and improve communication among your team members—all while saving you money. Reach customers that you couldn't reach before, present to large audiences from anywhere in the world, and get the word out about your company, product, or service without spending thousands on travel, venues and advertising.

Stay connected with your business even when you are traveling or working from home. You can start or join a WebEx meeting from any computer and any platform (Microsoft® Windows®, Apple® Mac®, Linux®, Unix, or Sun™ Solaris™). You can even use your smart phone to initiate or attend a meeting, so you're never out of reach or out of touch with your critical business operations.

Web conferencing helps you connect with people over the web. And in today's world of distributed teams, mobile workforces, global operations, and round-the-clock demands, you need the power of web conferencing to boost productivity, broaden your reach, and accelerate your success.

Why WebEx? SaaS, security, reliability, performance

Cisco WebEx solutions are delivered as software-as-a-service (SaaS) over the web, so they're easy to access from anywhere in the world, on any computer platform.

- Get started quickly, with no large upfront investment.
- Count on enterprise-grade security, reliability, and performance.
- Leave maintenance and upgrades to us so you can focus on your business.

There's no hardware to buy and no software to install. Just a low, predictable, monthly fee. Your subscription even includes upgrades and enhancements, so there's no need for additional resources.

Count on great meetings—whenever you need them. The Cisco WebEx Collaboration Cloud is designed to provide the most reliable and secure web collaboration service available. You get:

- Unmatched levels of fault tolerance for seamless and transparent performance.
- Superior performance and always-available reliability.
- Enterprise-grade security—from strict physical site security to tough data encryption standards.

Customers around the world trust their online meetings to WebEx. It's easy to make WebEx solutions part of your business. Just tap in from your browser or your iPhone. WebEx is always available when you need it, on-demand. This makes WebEx the ideal choice to fulfill your most ambitious goals for real-time web collaboration.
